## Summary

---

Frontend Developer (React, Next.js, TypeScript) with 3+ years of experience building scalable SaaS and enterprise applications. Strong background in refactoring legacy codebases, collaborating in Agile teams, and delivering high-performance web and mobile solutions.

## Skills And Tools

---

**Frontend Technologies:** HTML, CSS, JavaScript (ES6+), TypeScript.

**React and Related Technologies:** Next.js, React Native; state management tools such as Redux, Zustand, and Context API; testing tools including Jest and React Testing Library.

**CSS and UI Libraries:** Tailwind CSS, Bootstrap, Shadcn/UI.

**General Skills and tools:** Git, GitHub, REST APIs, Websockets, Docker, Axios, Three.js.

**Languages:** Arabic (Native), English (fluent C1)

## Work Experience

---

**Frontend/Mobile Developer at Pharaoh Soft.** – Cairo, Egypt

Jul 2025 - Present

At Pharaoh Soft, I contribute to the development and modernization of large-scale enterprise applications across multiple industries. I work closely with cross-functional teams, including backend developers, frontend engineers, and UI/UX designers, to ensure cohesive and user-centered product experiences.

- Modernize and refactor legacy codebases using React, Next.js, and TypeScript to improve performance, maintainability, and scalability.
- Collaborate in building new projects from the ground up, designing features and components aligned with modern design systems and business requirements.
- Switch between multiple active projects, adapting quickly to different tech stacks and product scopes.
- Work with both web and mobile technologies, including React Native, to deliver consistent experiences across platforms.
- Leveraged AI coding assistants to accelerate development, support legacy code refactoring, and validate solutions, while ensuring adherence to team standards and code reviews.

**Frontend Developer at Knowledge Bridge Solutions (KNB).** – Cairo, Egypt

Mar 2023 - Jun 2025

At KNB, I collaborated with backend/frontend engineers and UI/UX designers to build and scale high-performance SAAS applications for various industries. My responsibilities went beyond just writing code, I trained new team members, lead by example, and often take ownership of projects from concept to production.

- Build complete pages, components, and complex features from scratch to production-ready quality.
- Modernize legacy codebases by refactoring and rewriting them using React, Next.js, and TypeScript.
- Train new frontend developers joining the team to ensure smooth onboarding and consistent coding standards.

### Key Projects at KNB:

- **Events Management System:** Developed the majority of the frontend, including features for managing events, ticketing, venue layouts, online reservations, and an e-commerce store.
- **Marina Management System:** Developed the majority of the frontend of a comprehensive solution for marina logistics, including warehouse management, boat parking, maintenance, and online services.
- **Museum Management System:** Built an interactive 3D feature for viewing artifacts and developed the entire online store functionality.
- **Internal Infrastructure / Asset Management System:** Worked on the frontend of a system designed for managing employee records and assets within organizations.

**Front-End / Coding Expert AI Trainer at Outlier.** – USA (Freelance,Remote)

*Aug 2024 - Mar 2025*

- At Outlier, I trained AI models to reason and code like frontend developers by crafting challenging prompts and identifying weak points in their understanding of HTML, CSS, React, and other frontend technologies.

**Frontend Developer at Vekelz.** – Cairo, Egypt(Internship)

*Jan 2023*

- During my internship at Vekelz, I focused on honing my React and React Native skills while contributing to real-world features. My main tasks involved building reusable components and collaborating with senior developers to ship new features

## Portfolio

---

**Personal Portfolio**, Includes Personal projects and Personal introduction

- Technologies Used: HTML, CSS ,Tailwind CSS and Typescript.
- Visit My Portfolio ( [Link](#) )

## Education

---

**Al-Azhar University**, BS in Libraries and Modern Information Technology

*2015 – 2019*

- GPA: 83.3/100

**Advanced React Certificate**, from Scrimba - [[View Certificate/Link](#)]

*Dec 2022*
